

ACTIVATE

It's proven that the perfect sleeping microclimate is between 28-30C. **Activate**'s unique treatment regulates your body temperature whilst you sleep, creating the perfect temperature regardless if you are a hot or cold sleeper.

PCM thermo regulation technology absorbs excessive body heat, ensuring temperature regulation and the perfect microclimate for an undisturbed nights sleep.

HOW IT WORKS

Activate[®] treated fabrics contain phase change material (PCM) thermo-regulating capsules. These capsules are able to absorb and trap the heat created whilst sleeping, Once the body temperature reaches 33°C these dynamic capsules release the heat maintaining a constant regulated temperature.

KEY BENEFITS

-  Enhances thermal control
-  Reduces perspiration
-  Enhances drier, more comfortable sleep
-  More heat storage capacity
-  Perfect moisture management
