

Healthy Sleeping

COOLMAX® fabrics contain a unique fibre moisture management system.

These fibres were originally developed to meet the demanding needs of elite athletes. Today COOLMAX® fabrics are used widely in apparel and bedding where the specially designed fibres wick moisture away to keep you drier, giving you a cooler, drier and healthier nights sleep.

HOW IT WORKS

COOLMAX® fabrics wick moisture away through its patented four and six channel fibre.

KEY BENEFITS

-  Comfortable and soft
-  Breathable quick drying through it's specialising wicking yarns
-  Easy care/washable
-  Absorbs moisture and helps the fabric dry more quickly
