

Sleep Fresh

micraCOOL™

Feeling too hot can lead to a poor nights sleep as the body starts to release heat by perspiring. The micraCOOL™ finish through its hydrophilic function helps wick away perspiration to assist the body to cool down and give a better nights sleep.

HOW IT WORKS

micraCOOL™ is a finishing treatment that provides the fabrics with moisture management performance to quickly absorb moisture, improve antistatic and soil releasing properties.

KEY BENEFITS

Absorbs moisture and helps the fabric dry quicker allowing a more hygienic environment

Improves soil releasing properties making it easier to clean

The fabric is soft to touch and durable.
