

The Queen of Fabrics

silk

Silk, the queen of fabrics! Aesthetically, silk is known for its elegant softness and beauty, but this seemingly delicate fabric is in fact one of the strongest natural fibres, making it very durable.

Silk and its natural protein structure makes it the most hypoallergenic of all natural fabrics. Additionally, as an all-climate fabric, silk is warm in winter and comfortably cool when temperatures rise.

KEY BENEFITS

Hypoallergenic

Strong and durable

Soft and luxurious to touch

Temperature regulator

Highly absorbent
