

SILVERCARE

Silver has long been used in the medical industry because of its high resistance to bacteria.

Not only does it inhibit bacterial growth, it has also been proven to promote the growth of new cells in the skin, increasing the rate at which skin can heal.

HOW IT WORKS

Silvercare uses the technology of silver, to give you an advanced anti-bacterial and anti-odour treatment, keeping your mattress cleaner and fresher for longer.

Unlike other metals with anti-microbial properties, it is not toxic to humans and can be applied to any fabric being natural or synthetic.

KEY BENEFITS

Anti-bacterial

Anti-odour

Can be applied to all fabric synthetic or natural
